DETAILED ACTION

1. The amendment filed on June 30, 2005 has been received.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 9^{is} rejected under 35 U.S.C. 102(e) as being anticipated by Nemoto et al. (US 6,422,546).

Re-claim 9 Nemoto et al. disclosed, as shown in fig. 1-4, an active type vibration isolating support system comprising: an elastic body 14 for supporting a vibratory body E; a liquid chamber 24; a movable member 20; and an electromagnetic actuator 29 for driving the movable member, wherein the actuator comprises: a fixed core 32; a movable core 38 to be coupled to the movable member for being arranged opposite to the fixed core via a conical tube-shaped air gap; a coil 34; and a coupling device 40 coupled to the movable member to penetrate the movable core in an axial direction to be relatively movable to support a fixed core-side end surface of the movable core;; a set spring 42 provided between the movable member and the movable core; a stopper member 32b which, even after the movable core has reached a limit of movement on

Art Unit: 3683

the fixed core-side end surface, enables movement of the movable member toward the fixed core-side end surface while the movable member compresses the set spring, limits an amount of movement of the movable member after the movable core reaches the limit of movement.

3. Claims 1-8 and 10-14 are allowed.

Conclusion

4. Examiner had talked to Attorney Murat Ozgu on September 15, 2005 that claim 9 will be allowable if amended to include "wherein operating said coupling device adjust the air gap between the fixed core and the movable core".
